

EXIM Thailand Installs Water Spraying System to Help Alleviate Air Quality Problem

Export-Import Bank of Thailand (EXIM Thailand) recently installed water spraying systems at the roof top and around garden area of its head office to help reduce particle (PM2.5) pollution. Since early February, EXIM Thailand has operated water spraying systems and exchanged air quality information with Environmental Department of Phayathai District consistently. Welcomed by Dr. Nongnuch Laomaneerattanaporn (fifth right), Executive Vice President of EXIM Thailand, Mr. Suchai Sakulrungruangchai (fifth left), Director of Phayathai District visited installation sites of the water spraying system at EXIM Thailand on February 6, 2019.
